

Respectfully following our Greek traditions we have created a unique collection of handmade soaps with pure olive oil enriched with specially chosen Mediterranean herbs. Olive oil is a gift from nature and offers our skin a solid, natural, foundation for a healthy, radiant look. It is rich in antioxidants and vitamins A & E, deeply nutritious, thus improving the elasticity of the skin and helping to compensate for dehydration. It is a powerful anti-aging agent and has an intense penetrating and regenerating action.

Our soaps are made with ingredients, from specific geographic areas in the unpolluted and sunny Greek valleys. We do not use petroleum silicones, parabens, SLES, propylene glycol. All of our products are environmentally safe, pH balanced, animal product free and highly effective.
